

## Basic Sterile Dental Surgical Pack

The PrimeOn Basic Sterile Dental Surgical Pack carries all the necessary medical consumables required to create a sterile field for yourself and your patients when seated in a dental chair. Components of the pack are sterilised using ethylene oxide and placed in a headed bag featuring a sterilisation indicator sticker. This dental surgical pack can be used with procedures such as teeth extractions, dental implants, veneers, crowns, tooth exposure, bone grafting and the removal of foreign tissue and fragments.
