

## Comprehensive Sterile Dental Surgical Pack

The PrimeOn Comprehensive Sterile Dental Surgical Pack allows dental professionals to successfully prepare for surgical procedures and create sterile fields around your patient and their surrounds. Every component in this pack is sterilised with ethylene oxide and sealed together in a headed bag with a sterilisation indicator label. This pack is recommended for procedures including but not limited to implant surgery, extractions, maxillofacial surgery, orthognathic surgery, TMJ surgery, cleft-palate, mandibular surgery and facial aesthetics.
