

Specialised Impervious Gown

The PrimeOn Specialised Impervious Gown provides high level protection for healthcare workers against blood and bodily fluids. Light-weight SMS material for the back and knitted cuffs has been used to add an extra element of comfort and, at the same time, ensures the gown provides maximum protection while performing your daily tasks. By combining a SMS material laminate with an impervious film helps reduce the risk of liquid or blood strike-through, and the potential for cross-contamination

PrimeOn Specialised Impervious Gown
